

WHY MCINTOSH?

At McIntosh Farm Machinery, we take pride in delivering robust, high-quality equipment designed to withstand the toughest farming conditions for New Zealand farmers.

75+ Years of Expertise

A family owned and operated business with decades of experience in designing and manufacturing innovative farming solutions.

Unmatched Durability

Built with premium materials and precision engineering to ensure long-lasting performance in New Zealand's harsh conditions.

Tailored Solutions

Customisable machinery designed to meet your farm's specific needs, maximising efficiency and performance.

Reliable Support

Backed by dedicated after-sales service and expert advice to keep your equipment running smoothly.

SINGLE BALE FEEDER

The feeder farmers trust. When it comes to feeding out, reliability matters. The McIntosh Single Bale Feeder is a proven performer.

Built tough to handle the heaviest and wettest bales with ease, day in and day out. Designed and manufactured in New Zealand with decades of experience behind it, this machine delivers unmatched strength, minimal maintenance, and dependable feeding, even in the most challenging conditions.

With high-strength 3" 12,000 lb zinc-plated roller chains, robust construction, and a high-sided cradle for excellent bale retention, it's made to go the distance. Whether you're feeding from the left or right, the flexible side-feed design adapts to your operation with ease. Trusted by farmers, the McIntosh Single Bale Feeder isn't just built to perform, **it's built to last**. The flexible side feed design adapts to your operation with ease allowing you to feed from the left or right.

STANDARD FEATURES

McIntosh aggression pins

3000 PSI motor with 1 1/4" shaft and large key

8 tooth sprocket for extended chain life

3 and 4 tooth slats grip tough, uneven bales

OPTIONAL EXTRAS

- ☐ Square bale attachment
- ☐ Back panel with waste basket
- ☐ Ram release on headstock

Model	Length (mm)	Width (mm)	Height (mm)	Weight (kg)
SINGLE BALE FEEDER	1700	2300	940	790
SINGLE TROUGH BALE FEEDER	1750	3300	940	895

NB: All weights and measurements are approximate and dependent on specifications and may change without notice.

THE MCINTOSH CRADLE

The Single Bale Feeder is engineered with a shorter cradle to reduce the chance of bales twisting and slowing down the feeding process. High front and rear bars provide added security, keeping bales firmly in place while travelling or feeding. This compact design feeds more efficiently than longer cradles, ensuring faster operation and less waste.

Fitted with McIntosh aggression pins, even the most difficult bales are pulled apart, improving the spread of feed. Without proper end bars, bales can shift or fallout, reducing both the speed and consistency of feeding out. With the McIntosh cradle, you can count on reliable performance every time.

Square bale attachment

Back panel waste basket

Feeds out either side

SINGLE TROUGH FEEDER

Engineered with the same strength and reliability as our standard bale feeder, the McIntosh Single Trough Bale Feeder offers a simple, efficient solution for feeding into troughs or along fence lines. It's ideal for farms that value control and precision.
